1 ATTENDANCE

WG Members:

Enes Abanoz (TR), Jamal Abdul Nasir (IE), Carlos Arcila Calderón (ES), Christian Baden (IL), Barbora Badurova (SK), David Herrero-Blanco (NL), Ljubisa Bojic (RS), Hajo Boomgaarden (AT), Milan Cabarcapa (RS), Bekir Cetintav (TR), Anita Ciunova-Shuleska (MK), Fabio Crestani (CH), Carlos Cunha (PT), Özlem Delal Abanoz (TR), Emese Domahidi (DE), Ardita Dylgeri (AL), Dren Gerguri (KV), Jelena Gledic (RS), Roksana Gloc (PL), Valmora Gogo (AL), William Gonzalez Baquero (ES), Johannes B. Gruber (DE), Edlira Gugu (AL), Damian Guzek (PL), Agnieszka Hess (PL), Muhamet Jahiri (KV), Ana Jovancevic (RS), Ledia Kazazi (AL), Nelda Kote (AL), Ema Kristo (AL), Barbara Lewandowska-Tomaszczyk (PL), Larisa Mistrean (MD), Anela Mulahmetovic Ibrisimovic (BA), Sule Yüksel Özmen (TR), Nikolina Palamidovska-Sterjadovska (MK), Ardita Reci (AL), Sjoerd Stolwijk (NL), Gabriella Szabo (HU), Celia Tsui (UK), Aleksandra Urman (CH), Selma Veseljevic Jerkovic (BA), Lenka Vochocova (CZ), Olga Zagovora (DE), Alban Zeneli (KV)

Guests:

Emiljano Kaziaj (COST), Elvira Fetahu (Rector, U of Elbasan A. Xhuvani), Gëzim Qerimi, Reinout Vos (Ambassador to Albania, The Netherlands)

...as well as several Hybrid Participants

Janet Aver Adikpo (TR), Serap Durmuz (TR), Dana Guy (IE), Damian Trilling (NL), Christina Viehmann (DE)

19 COST countries represented:

Albania, Austria, Bosnia and Herzegovina, Czechia, Germany, Hungary, Ireland, Israel, Moldova, Netherlands, North Macedonia, Poland, Portugal, Serbia, Slovakia, Spain, Switzerland, Turkiye, UK.

...as well as 1 non-COST country

Kosovo

2 OBJECTIVES

The Objectives of the WG III.2 meeting were:

- to ensure the delivery of the third volley of deliverables
- to utilize synergies between the WGs' work and ongoing project collaborations
- to advance strategies for the utilization of outcomes and outreach to stakeholders

3 Agenda

Monday, 26 May 2025

09:00-09:30 *Arrival & Coffee (University Hall)*

09:30-10:00 **Welcome Plenary**

Room 107

▪ **Welcome**

Christian Baden, Chair

Elvira Fetahu, Rector of the University of Elbasan Aleksandër Xhuvani

Reinout Vos, Dutch Ambassador to Albania

Edlira Gugu, Local Host

▪ **Introduction of Project Space & Workshop Sessions – hosts**

▪ **Practical issues –Edlira Gugu**

10:00-13:00 **Working Group Sessions I** (*parallel sessions, Library Building*)
(*with coffee break around 11:30-11:45, Library Hall*)

Theory	Tools	Data & Application	Dissemination & Inclusion
Room 003	Room Studenteve	Room Digitale	Room Ovale
<i>Chair:</i> <i>Gabriella Szabó</i>	<i>Chair:</i> <i>Johannes B. Gruber</i>	<i>Chair:</i> <i>Marina Popescu</i>	<i>Chair:</i> <i>Carlos Arcila Calderon</i>

13:00-14:15 *Lunch (Bistro Italiano, Sule Harri)*

14:15-15:30 **Masterclass: The role of Deepfakes in shaping digital opinion**
Dren Gërguri, U of Prishtina
Room 003

15:30-16:00 *Coffee (Library Hall)*

16:00-18:00 **Project Space & Workshops** (*parallel sessions*)

Shaded entries are closed groups; ★ marks new initiatives. Any initiatives beyond those listed are welcome to meet in the open space.

★ Opinions & perceptions of Albania	LLMs as tools for Textual Analysis	LLMs in the identificat. of affective states	Unpacking citizens' opin. manifestation	Open Space
Room Digitale	Room Ovale	Room 003	R'm Studenteve	Room LLC
<i>Hosts:</i> <i>Ema Kristo & Ardita Reçi</i>	<i>Host:</i> <i>Ljubisa Bojic</i>	<i>Host:</i> <i>Barbara Lewandowska-Tomaszczyk</i>	<i>Host:</i> <i>Gabriella Szabó</i>	

18:00-20:00 *City Walking Tour (voluntary; meeting point at University gate)*

20:00 **Joint Dinner** (*voluntary, self-paid*)

Presto Pasta

Rruga 25 Nentori

Tuesday, 27 May 2025

09:00-09:30 *Coffee (Library Hall)*

09:30-12:30 Plenary: Progress, Problems, Propositions

(with coffee break 11:00-11:15, Library Hall)

Room 003

- **Stories behind the stories: Exploring Journalistic, Alternative Content Producers and Citizen-Driven Content in the digital era**
Abit Hoxha, U of Adger
- **COST Experts** - Emiljano Kaziaj
- **OPINION Podcast Series** - Wendo King'ang'i
- **State of affairs panel: Haves & Needs** - *Working Group Chairs*
- **Break-out sessions**
- **Discussion** - *Chair: Christian Baden*

12:30-13:45 *Lunch (Bistro Italiano, Sule Harri)*

13:45-17:15 Working Group Sessions II (parallel sessions)

(with coffee break 15:30-15:45, Library Hall)

Theory	Tools	Data & Application	Dissemination & Inclusion
Room 003	Room Studenteve	Room Digitale	Room Ovale
<i>Chair:</i> <i>Carlos Cunha</i>	<i>Chair:</i> <i>Johannes B. Gruber</i>	<i>Chair:</i> <i>Hajo Boomgaarden</i>	<i>Chair:</i> <i>Carlos Arcila Calderon</i>

17:30-18:00 Closing Plenary & Wrap-up

Room 003

- **Next Steps** - *Working Group Chairs*
- **Closing** - *Christian Baden*

4 OPENING PLENARY SESSION

Christian Baden, Chair

- Greetings, Elvira Fetahu, Rector of the University of Elbasan Aleksander Xhuvani
- Greetings, Reinout Vos, Ambassador to Albania, Kingdom of the Netherlands
- Given the progress in the working groups, we have arrived at a point where it becomes ever more important to reconnect across working groups to make outputs useful and devise outcomes that go beyond the specific purview of each working group.
- OPINION continues to support project-based collaborations among its members, the next STSM application deadline is on 2 June.
- OPINION has adopted COST's new initiative to support Young Researchers and Innovators presenting their work at international conferences (YRI Conference Grant). The new line of grants works exactly like the existing ITC Conference Grant, with the sole difference that also young researchers based outside of ITCs can apply.
- OPINION has begun to systematically work on its outreach activities, such as the Webinar series (more suggestions welcome) and the OPINION Podcast series (see main plenary)
- OPINION has started to look toward sustaining its activities beyond the life time of the COST grant (see closing plenary)

Quick introductions of the WG agendas for the meeting (see below)

Quick introductions of the novel initiatives and still open collaborations

- Opinions & Perceptions of Albania -*Ema Kristo & Ardita Rec*
- LLMs vs Humans in content analysis -*Ljubisa Bojic*
- LLMs in the identification of affective states -*Barbara Lewandowska-Tomaszczyk*

A word from our Host

Edlira Gugu, Local Host

- Practical issues
- Walking tour
- WG Dinner

5 MAIN PLENARY

Emiljano encourages anyone interested to sign up as a COST Expert to assist COST in the evaluation or proposals and Action results and outcomes. You can sign up via your e-COST profile.

Emese introduces the new OPINION Podcast series, hosted by *Wendo Christine King'Ang'i*, *Mario Haim*, and herself. There are 13 episodes so far, and the first one has just been released. To follow, go to <https://aboutccs.net/opinion> or find it on Spotify (search for "What is it about Computational Communication Science")

OPINION has resources to support outreach activities of various kinds - so if you have ideas for webinars, workshops, etc., please reach out to us.

Progress, Problems, & Propositions

In a panel discussion, WG leaders Carlos Cunha (WG1 Vice Chair), Johannes B. Gruber (WG2 Chair), Hajo Boomgaarden (WG3 Chair), Carlos Arcila Calderon (WG4 Chair), and Christian Baden (Action Chair) discuss current challenges and avenues forward for the network.

Key themes include:

Ethics of using LLMs/GenAI for opinion research: What recommendations can we make for their use?

Building a platform (virtual lab) for public use and accessibility of OPINION outcomes: What should be key contents, and how can they be made useful?

Teaching materials: What are key contents and needs that we can address, or areas where OPINION can add value to what exists?

Tool sharing and tutorials: Where and how can we enable users to employ available tools in a fashion guided by best practices (e.g., creating walk-throughs, tutorials)?

Data sharing standards: How do we ensure that proposed data sharing standards are useful to the community and work across many applications?

Manifesto or White Paper: What recommendations can and should we make for different stakeholder groups?

Can and should OPINION weigh in on current developments in the regulation of, and policy formation around, Generative AI?

How can we design outcomes such that they can remain useful and accessible for the longue durée, e.g., by feeding and using knowledge bases developed by larger initiatives such as MeDem?

Padlet Board: universityofleeds.padlet.org/yystsui/opinion-network-collaboration-board-elbasan-may-2025

Three breakout groups were formed to discuss Ethics recommendations, Teaching Materials, and Tool Walk-Throughs.

6 WORKING GROUP SESSIONS: WG1 THEORY

Session I: Glossary

Introduction of new members. Names Celia Tsui and Özlem Delal Abanoz introduce themselves.

Subgroup reports

Public Opinion - Christian

Working on editing the long literature review chapter for book from close to 19,000 words down to 7500 words. Currently at 8000 words.

Political Communication and culture studies - Lenka

Some projects including Literature Review chapter for book.

ECREA Interim PolComm Section (Sept, 2024) panel on cringe politics has been accepted, co-convened by Lenka & Gabriella.

Linguistics - Barbara

Two papers presented, one in Salamanca and one in Santiago de Compostela and published in proceedings of Linguistics.

Third paper on Opinion Change more qualitative in character, including 2 sets of data from Global Warming to Trump. Interesting results.

Affective states and opinion identification project, as well as two smaller projects.

Barbara's STSM visit to Bremen, study on millennials, boomers, zoomers.

Barbara's university conference that included Christian, Agnieszka, and Omnia; will lead to special issue.

Christian - reminds of section on website Results

Gabriella - presents general overview of book project and stay tuned for more details from Agnieszka.

Glossary

Presents task force (editors are Gabriella, Carlos, Tamara, Jüratè).

After Lyon had regular meetings.

Most Important emails end in spam.

The more reviews you write well, the more you are asked to write.

General discussion.

Present Manifesto idea for tomorrow.

Barbara on LLMs and work with other WGs.

List of AI collaboration on validation of other languages like Hungarian, Polish, Slovak...etc.

EU working on regulation of AI (European AI Act) has gray zone on what is ethical and why not use our expertise to add to discussion.

Barbara - that AI needs to be taught about implicit language.

Christian - Want to have opinion data but don't want to give to American multinationals.

Performance people want to feed as much data as can into AI algorithm to increase accuracy.

Ethicists want to restrict data upload in certain cases.

Barbara - There will always be classified data that is not put into AI. Fake in = fake out. And depends on the language that is used. In English get data on sexual worker but in polish = roadblock because unethical to even address this because programmed not to provide that data.

Christian - if data not provided then the AI not as efficient and has bias.

What can do is try to deal with boundaries and criteria of implementation. AI good at sentiment data but not other things.

Networks matter. Multimodality matters.

Perhaps use white board to organize ideas.

Session II: Manifesto

Manifesto brainstorming session.

Stakeholder: Digital Industry and Big Tech - Carlos

Industries want to move forward. What incentives Opinion give them?

Fake news groups, Fake reviews are issues.

Big ideals???

Quality aids in competition.

Better is to deal with biases.

Don't focus on opinion in general but instead on identity that provides better results.

Making data anonymous allows business to deal with ethical concerns.

Politicians make Policy such as regulations.

General advantages from Academic Theory.

Focus on individual ethical issues.

Stick to group opinions, and target groups not individuals.

But can lead to stereotypes as a result.

Tendency to classify and count.

Problem with AI is generally deals with stuff everyone knows about opinion.

Bekir - companies have already classified individuals.

How limit allow groups to coalesce around a particular idea that could be harmful.

Validity of interests is what companies care about and not corporate social responsibility.

General vs. narrow.

Don't bother dealing with privacy issues because that ship has sailed.

Stakeholder: Educators/Scholars - Gabriella

Diverse group from elementary school to University.

What is journalist role these days? How influence opinion?

What do journalists want to know?

Christian - journalist are observers, but also journalists are users of media.

Media journalism is different than investigative journalism.

Need new capacities and new skills.

Also good to contact them in media role as a presentation (such as webinar).

Stakeholder: Marketing and Advertising - Anita

Shape opinion of customers on brands.

What want to communicate?

Ethical behaviour.

Tools and applications and AI.

What do they want to know?

Tailor content

Perhaps via video can reach different languages and cultures.

Christian - write manifesto, but to achieve need multimodality.

Advertising and marketing do care about ethics and are in different context because they have an interest in this as compared to Digital Industry and Big Tech.

Stakeholder: NGOs - Agnieszka H.

Very broad, from micro and local to very large.

Also Minority groups, LGBTQ, etc.

Christian - what can say broadly about NGO?

General discussion on Stakeholder session.

Maybe need 4 big messages that come in 9 differ flavors for each stakeholder group.

Ethics.

Ways digital media is differ.

Should not be only messages that everyone knows.

Put out what have come up with to see where there is convergence.

7 WORKING GROUP SESSIONS: WG2 TOOLS

Status of Deliverables

We are now working on all deliverables in parallel:

2.1 (Inventory of existing tools): writing up and data analysis are in progress. Christina volunteered to organize the writing up in Lyon and several people have added to the paper since.

2.2 (Joint publication on strategies and recommendations for the automated extraction of textually expressed opinions): the draft is growing.

2.3 (Online teaching material): WG2 has heavily contributed to both training schools organised by WG4. We handed off our material, which is centrally presented by WG4. Our work here is essentially done.

Session I

After an update from Johannes on the ongoing tasks and the Deliverables, we discussed the possibility of a WG meeting this year and how we would ideally use our time during that meeting. Since we expect to be formally done with all deliverables until the end of the year, there were two potential cases discussed: 1. Use the WG meeting to make a final push towards completing the two papers; 2. Start working on additional outcomes. As there were several members of WG3 in the room, the loose idea formed to hold a joint meeting with WG3 and discuss contributions to the deliverables in that WG, since there is some overlap. Roksana volunteered to organise the WG meeting in Krakow and Jamal volunteered to organize the meeting in Galway. We postponed the discussion until a future online meeting, as the planned hybrid meeting could not take place due to technical difficulties. We spent the rest of our time working on tasks of D2.1 and D2.2 in smaller groups.

Session II

We continued work and discussions on the two papers.

8 WORKING GROUP SESSIONS: WG3 DATA & APPLICATION

Status of Deliverables

Work on the first two deliverables takes place in parallel, discussions of the shape of D3.3 have started:

D3.1 Data archival facility for opinionated text and interface for the application of key tools for the extraction of textually expressed opinions: Coding scheme for data archival facility (METEOR) has been finalised and agreed upon during the meeting. Relevant datasets have been identified through the work of WP2 and will be added to METEOR based on the coding scheme. Coder training session takes place either early July or late August online. Online interface allowing novices to the field to run popular tools over a csv file type of text data set will be prototyped.

D3.2 Joint gold standards for the extraction of textually expressed opinions in different discursive contexts: The report takes shape and will focus on standards for data sharing practices. Draft to be circulated in September to finalize before the next meeting.

D3.3 Computational Communication Lab: Shape to be determined over the next months.

Session I

Due to late arrival by WG lead Hajo and short-term cancellation by WG vice lead Marina the Day 1 meeting could not take place. WG members joined other WGs in this time slot.

Session II

We had a short discussion of the coding scheme and the implementation of the coding procedure in METEOR, including coder training sessions, work division etc. Subsequently, we discussed the interface and its desired functionalities and possible architecture. The final discussion centered around standards and meta-data for proper data documentation and sharing. Followed by a short discussion between WG2 and WG3 leads on overlaps of D3.2 with D2.2 that needs to be taken into account. Also discussed follow up meetings, potentially in collaboration with WG2 later this year or early next year.

9 WORKING GROUP SESSIONS: WG4 INCLUSION & DISSEMINATION

Update on Ongoing and Completed Outputs

The WP4 session began with an overview of progress made by group members in alignment with the strategic goals of this work package. The discussion helped identify significant accomplishments as well as areas for further development in the coming months. First, the current status of the paper led by Ljubiša Mitrović and collaborators was presented. This publication, focused on the use of computational methods for analyzing opinionated content, has had a positive impact within the network and was acknowledged as a solid foundation for future projects. Participants discussed expanding this line of research to new linguistic or geographical contexts or integrating comparative analyses across countries.

The group also reviewed a second manuscript currently in development, centered on the needs and adoption of computational methods among scholars in the social sciences and communication fields. This study aims to identify current skill levels, access barriers to tools and technologies, and motivational factors influencing the uptake (or avoidance) of computational approaches. It is seen as a valuable contribution to understanding epistemic inequalities in digital knowledge production. Another key achievement is the development of a collaborative GitHub repository, which will host all the materials generated during the two Training Schools organized by the OPINION network. This repository will include presentations, code scripts, teaching materials, suggested readings, and methodological guides. Emphasis was placed on making this repository open access, so it can be widely used by students, researchers, and educators—especially those from under-resourced contexts.

Proposal for In-Person WG4 Meeting & Development of Ethical Protocols

In line with WP4’s commitment to inclusion, research ethics, and methodological integrity, the group discussed the possibility of holding an in-person meeting for Working Group 4 (WG4) in October 2025 in Málaga, pending availability of funding. One of the main objectives of this meeting would be to advance the development of ethical protocols for multilingual computational research on digital opinion using large language models (LLMs). These tools pose significant challenges regarding algorithmic transparency, cultural and linguistic bias, data handling, and informed consent. To support practical reflection, the group proposed the design of a case study simulating a research scenario involving LLMs. This would help identify ethical dilemmas, methodological decisions, and actionable recommendations. The goal is to generate a set of ethical guidelines and operational suggestions that can be adopted by OPINION network researchers and beyond.

Dissemination Strategies and Subgroup Work

The third session focused on strengthening the dissemination strategy for WP4, understood as a cross-cutting process combining scientific outreach, network building, and the democratization of knowledge. Three priority areas were identified:

- Production of accessible science communication articles: The group agreed to prepare non-technical summaries of key research outputs from the OPINION network, aimed at a broader public. These articles will be tailored for digital media platforms, academic blogs, and university newsletters.
- Creation of a science communication article on the OPINION glossary of key terms: The glossary is considered a valuable pedagogical tool, and the group will invite WG1 to collaborate in the writing and promotion of this piece.
- Formation of a LinkedIn dissemination team: A dedicated team is being formed to manage the network's professional presence on LinkedIn. The strategy includes regular content publication, such as event updates, research highlights, training opportunities, and calls. Members of the OPINION network will be encouraged to actively contribute.

Proposals for Future Lines of Work within COpA Summer School

Dedicated time was allocated to reflect on and share ideas for future editions of COpA, the summer school focused on computational methods for the analysis of opinion and digital communication. COpA is a core training initiative of WP4, committed to fostering interdisciplinary and inclusive learning for early-career researchers. Building on the experience of past editions, the group outlined several potential thematic and methodological directions to expand COpA's relevance and impact:

- Integrate sessions on the challenges posed by large language models (LLMs): Proposed topics include applications, limitations, embedded biases, and epistemic risks, particularly in multilingual and multicultural contexts.
- Critically explore the idea of using LLMs as experimental proxies for human participants: While innovative and thought-provoking, this idea was considered more suitable for theoretical exploration than immediate practical implementation, due to ethical concerns.
- Enhance technical modules on scalable computational platforms: The group suggested incorporating specific training on infrastructure for processing large-scale opinion data, including collaborative environments, workflow automation, and social media APIs.

- Develop sessions on validation of computational models in communication research: This track would aim to establish shared standards for assessing reliability, reproducibility, and robustness of models used in opinion and discourse analysis.

Suggestions for Future Masterclasses

To close the session, the group discussed potential speakers for upcoming masterclasses organized by the network. The objective is to expand critical engagement with artificial intelligence, emerging technologies, disinformation, and digital regulation. The proposed experts include:

- Sandra Wachter (Oxford Internet Institute / Hasso Plattner Institute)
- Sandra González-Bailón (University of Pennsylvania)
- Natalie Helberger (University of Amsterdam)
- Zeynep Tufekci (Princeton University)
- Regina Cazzamatta

Conclusion

The WP4 working sessions held during the 6th Joint Working Groups Meeting of the OPINION network revealed a strong collective commitment to the core principles guiding this work package: inclusion, equitable training in computational skills, research ethics, and the effective dissemination of knowledge.

Over the two-day meeting, significant progress was made in consolidating scientific outputs and training resources developed by group members. Discussions around ongoing and completed publications provided an opportunity to define future research pathways and to explore the potential for new cross-institutional and multilingual collaborations. The upcoming release of the open-access GitHub repository containing all Training School materials was recognized as a major milestone in the effort to democratize access to methodological and pedagogical tools. In parallel, the debate around a potential in-person WG4 meeting and the development of ethical protocols reflected a transversal concern with ensuring that advanced technologies—such as large language models (LLMs)—are used within frameworks of responsibility, transparency, and respect for cultural and linguistic diversity. The proposal to create case-study-based protocols represents a valuable strategy to connect theoretical reflection with the concrete methodological challenges faced by communication researchers in digital environments.

The subgroup discussions on dissemination strategies reaffirmed WP4's commitment to knowledge openness and to building bridges between academic research and non-specialist audiences. From science outreach articles to the launch of a LinkedIn strategy, these actions aim to amplify the reach of OPINION network outputs and position its contributions in diverse public and professional arenas. Likewise, the collective planning around future editions of the COpA summer school reinforced its relevance as a unique and inclusive training space for critical, interdisciplinary, and collaborative engagement with computational methods. The proposed expansions to COpA's content and infrastructure suggest a strong trajectory for growth and innovation in the coming years.

10 CLOSING PLENARY SESSION

Christian Baden, Chair

Each Breakout Session from the Main Plenary reported on the progress made during the meeting.

The Training School CopA II will take place on the following two days, focusing on algorithmic bias, social network analysis, multi-modal analysis and multi-lingual analysis.

Please suggest ideas for outreach activities (workshops, webinars, etc.) and check out the podcast series!

There is a growing number of OPINION publications in high-ranking journals (most recently, a paper in Nature Scientific Reports by Ljubisa, Olga, Asta, Vuk, Milan, Selma, and Ana: <https://www.nature.com/articles/s41598-025-96508-3>)

OPINION has adopted a policy for Open Access support. To apply, a paper must meet the criteria for network publications (WG publications or members from 3+ institutions), undergo independent peer review, and there must be no other funding sources or discounts available to cover article processing charges. Authors should notify the Core Group as early as possible about upcoming publications for which they intend to apply for OA support (i.e., already upon submission), and submit a formal application once they have received a positive response from the publisher or journal (e.g., Revise & Resubmit decision). For details, see the OPINION website.

OPINION is presently pursuing two avenues to extend its activities beyond the life time of the COST grant:

1. OPINION aims to contribute to MeDem (Monitoring Electoral Democracy), a European-wide Research Infrastructure project that is presently being proposed by a large group of institutions, including several OPINION members, spearheaded by Hajo and the U of Vienna. MeDem is much larger in scope, but includes a competence center for computational textual research, which draws upon existing knowledge bases from the (concluded) OPTED project such as METEOR. By contributing to these knowledge bases, OPINION outcomes can become part of the much larger research infrastructure, once (and if) it is granted.

2. OPINION has entered into a collaboration agreement with COMTEXT, a recently founded association of computational text researchers that emerged from the PolText initiative, headed by OPINION member Miklos. COMTEXT organizes an annual conference (usually in Europe) and maintains an association that asks for rather modest membership fees (€20 for faculty, €10 for students). There are numerous overlaps in interest, scope, agenda and even membership between OPINION and COMTEXT. OPINION members are warmly encouraged to join COMTEXT.

The forthcoming COMPTExT conference will likely take place in Birmingham, in May/June 2026. We have agreed to hold an OPINION event in the format of a preconference at the next COMPTExT conference (proposals/ideas welcome). OPINION members are also invited to submit to the main COMPTExT conference. OPINION members will also have access to a range of methodological workshops that COMPTExT offers, free of charge, on the day prior to the conference.

In return, COMPTExT members will have access to the OPINION COpA III training school in 2026 (location and focus still to be determined).

To check out and possibly join COMPTExT, see <https://www.comptextconference.org>.

Finally, a huge thank you to Edlira Gugu and the entire team at U Elbasan A. Xhuvani for graciously hosting us, organizing a wonderful meeting and taking such great care of us during our days in Elbasan!

OPINION | COST Action CA21129

ANNEX A: SIGNED ATTENDANCE LISTS
Monday, 26 May 2025

This information is collected for the purpose of ensuring eligibility for reimbursement of your expenses under the COST Activities Rules for COST Actions Level C and, when the meeting takes place in COST premises, for safety purposes in compliance with our legal obligations under Belgian law. It will be kept for the duration of COST audit obligations as mentioned in the privacy notice for e-COST. It won't be transferred to any third party except in case of law for safety purposes where it will be transferred to the landlord of the premises and emergency services.
