

Report on the outcomes of a presentation and participation in a ITC Conference¹

Action number: CA21129

Grantee name: Dren Görguri

Conference Details

Conference title: IAMCR “Peripheries and Connections: Media, Communication, and Transformation”

Conference web-page: <https://iamcr.org/galway2026>

Conference venue²: Galway, Ireland

Accepted contribution details

Title of the presentation: Factors shaping deepfake detection: Cross-country evidence from Brazil, China, France, and the US

Co-authors:

Other details of the presentation: specify here any additional details related to the contribution (e.g. title of the session / track of the conference programme in which the contribution is accepted)

Outcome of the conference participation

Participation in the IAMCR Conference provided a valuable opportunity to present my research on deepfake detection in a comparative international context and to receive constructive feedback from scholars specializing in media, communication, and political communication. The discussions following my presentation helped refine both the conceptual framing and methodological approach of the study, particularly regarding the relationship between deepfakes, disinformation, and opinion formation across different cultural contexts. The conference also enabled me to establish new connections with researchers working on computational communication, digital media, and disinformation, creating opportunities for future collaborations on publications and research proposals. These exchanges broadened my professional network and opened possibilities for interdisciplinary cooperation. My participation also contributed to the objectives of the COST Action OPINION by disseminating the network's research agenda among an international audience and by highlighting the relevance of studying deepfakes as an emerging challenge for understanding opinionated communication. The knowledge and feedback gained from the conference have strengthened my ongoing research and will also be integrated into my teaching and supervision, contributing to the broader dissemination of current research on digital communication, disinformation, and opinion formation. Additionally, I had the opportunity to connect with members of other COST Actions and relevant IAMCR Sections, which may open further interdisciplinary cooperation. Being present at IAMCR also reinforced the visibility of the OPINION COST Action within a broader academic community.

¹ This report is submitted by the grantee to the Action MC for approval and for claiming payment of the awarded grant. The Grant Awarding Coordinator coordinates the evaluation of this report on behalf of the Action MC and instructs the Grant Holder Manager to verify the grant documents compliance and proceed with the payment.

² For an online conference, specify virtual participation; for hybrid conferences, specify whether it is an in-person or virtual participation.

Acknowledgement of inclusion of necessary supporting documents to claim the grant

I confirm that the following documents have been uploaded on e-COST as an integral part of this report:

- the certificate of conference attendance issued by the conference organiser.
- the programme of the conference or book of abstracts / proceedings indicating the presentation (oral) of the grantee.
